(57) Abstract:

PROBLEM TO BE SOLVED: To provide voice data to a terminal equipment by introducing the voice data stored in a telephone network voice storage server to a computer network information storage server.

SOLUTION: Voice data from a telephone terminal equipment 11 is stored in a voice storage section 71 of a telephone network voice storage server 7 via a telephone network 9 and when a terminal equipment 1 enters an information service request of voice data, the information service request is sent to a server section 51 of a computer network voice storage server 5 via a network 3. The server section 51 introduces the voice data stored in the voice storage section 71 of the telephone network voice storage server 7 and stores the data to a storage section 55 and the voice data are provided to the terminal equipment 1 from the storage section 55 via the network 3.
